Create account through email address, and verify your account

The screenshot shows a web browser window with the address bar displaying "cocalc.ai/auth/sign-up". The page title is "Create your CoCalc account". The navigation bar includes links for Features, Guides, Docs, Products, Pricing, News, About, Policies, and Support, along with "Sign in" and "Sign up" buttons. The main heading is "Create your CoCalc account". Below this, there are two options for account creation: "Continue with Google" and "Continue with email". The "Continue with email" option is highlighted with a red rectangle. The email sign-up form includes a text input field for the email address, which contains "you@example.com", and a "Continue with email" button. Below the button is a link that says "Use a password instead". The footer contains the CoCalc logo, a description of the platform, copyright information for SageMath, Inc., and a list of links for Platform, Resources, and Company.

Within the project, create a notebook, use the name you like

Write some code

Run the code

The screenshot displays the CoCalc web interface in a browser. The address bar shows the URL: `cocalc.ai/projects/002fab34-722f-4ea5-9e3d-bc7cc4c7c6b7/files/home/user/2026-09-23-140320.ipynb#id=d6095c`. The interface includes a top navigation bar with tabs for Agents, Projects, List, and a dropdown menu for DATA1009. A status bar indicates "Free project runtime 30:00" and provides information about the runtime policy. The main workspace shows a Jupyter notebook with a single code cell. The cell contains the code `In [4]: print("hello world!")#` and the output `Out[4]: hello world!`. The "Run" button, located at the bottom right of the code cell, is highlighted with a red rectangular box. A tooltip with the text "Run this cell" is visible over the button. The interface also features a left sidebar with icons for Files, Agents, New, Find, Docs, Settings, VMs, Docker, Image, and More. The bottom of the workspace has buttons for Code, Text, Paste, and Generate....

How to add cells
